While the latest official statements give new details of the great battle which is being waged in France and in which three millions of men are engaged, it seems apparent that the German forces are still falling back from the announcement that the allies have gained 25 miles of territory in their advance.

Both the German and French troops have crossed the River Marne, the British cutting them and going. The action of greatest severity is being fought between the Marne and the Yonne.

In an engagement between British and German troops in the Yonne, the British have been driven back to the River Somme, which is part of the frontier between the British and German provinces.

Prince Joachim Albert, of Prussia, son of the late Emperor Frederick, has been reported to have been killed in the Yonne.

The British prime minister has called for more men to serve the country, and when the government places are completed the British army will number 1,500,000 men.

National British casualties have been made public covering the period up to September 7 and bringing the total for the campaign close to 10,000 killed, wounded and missing.

"WHY THIS STRINGENCY" DISCUSSED AT LUNCHEON

H. M. E. Evans, Speaking From Viewpoint of Banker, Declares Canada Has Passed Critical Period—Future Must See Development of Production in Canada.

(From Evening Edition)

That financial matters are a live issue in the business world of Edmonton was evidenced by the unusually large attendance at the luncheon of the Industrial Association at Gregory's.

The speaker, H. M. E. Evans, banker, discussed the "Why This Stringency" in the current market.

He said that the City Grocery, while on behalf of the retailers, spoke the truth in its assessment of the war.

Mr. Evans considered we should have a considerable amount of money from the war, but the inflation of the money market, he said, would be a serious handicap.

He said that the Canadian government should be able to overcome this disadvantage by the issue of war bonds.
